KeyForCare is a division of the WeCare healthcare consulting company in Stockholm. With over 150 hospital and clinics, and 1200 patient satisfaction stories every month, and with 250 Managers getting feedback every week from patients - KeyForCare is your optimum way of improving your patient delivery.

Change-Management made easy. The simple tool that delivers patient involvement and better care.

The Problem. Every Organisation, Clinic, Hospital - has to continually aim to improve its services to patients.

The changes you need to make - are not large or extensive. Often, they are the small, simple adjustments - but that when added together, make a big result. But so often, you do not have the time to work out yourself, what those changes are.

The best people to tell you how to improve - are your Patients.

The Answer. KeyForCare - is a structured and small but very precise, series of Questions that you define, for

each of your Patients to answer on leaving your Hospital or Clinic.

Typically there are only FOUR areas or dimensions that summarise the patient experience.. The responses from your Patients, will give you a clear picture of the areas and little things, that you need to modify.

Some Key facts; everybody talks about patient involvement - but few understand how to deal with that.

Digitalisation is said to be the future - but so far, it tends to increase costs and admin.

KeyForCare is inexpensive to run - and 95% of the suggested

improvements require NO COST to implement.

Try for Yourself. We are inviting any Hospital or Clinic to try KeyForCare, for yourself, as a Pilot.
